

Clean, sonically accurate, and yes, extremely powerful,

the highly-innovative Radia 210i delivers breakthrough performance in an active subwoofer. Using a proprietary Reactance Canceling Design™ with dual 10-inch, long-throw Kevlar™ woofers, the 210i adds a sense of weight and depth that will make even the finest systems more engaging. The dual woofers, which are mechanically coupled via a rigid cylindrical housing, are electrically connected in phase and mounted with their cones facing in opposing directions. This causes the reactive forces of each woofer to effectively cancel one another and allow for the degree of tight, detailed bass notes that are found only in the world's leading designs.

As with all our loudspeakers, the Radia 210i is crafted from the finest materials with zero tolerance for error and a maximum desire for discrete high fidelity.

Stunning sound. Small footprint. Unique style. World-renowned design. The critically acclaimed Radia 210i is a revolutionary advancement that is a revelation to even the most discriminating audiophiles.

- › **Detailed** Exclusive Reactance Canceling Design eliminates unwanted vibration for tighter, quicker and more accurate sound.
- › **Dynamic** State-of-the-art amplifier delivers 500 watt RMS with transient peaks well beyond 1,000 watt.
- › **Powerful** Two 10-inch Kevlar woofers approximate the output of a conventional 15-inch subwoofer.

The 210i has been tailored to blend seamlessly with our entire Radia Series yet is versatile enough to work amazingly well with just about any high-end audio system. Driven by a state-of-the-art 500-watt digital amplifier, the 210i has the power to add a visceral element that is so vital to the finest home theater systems. The 210i also features phase switching, line level input, gain control, adjustable crossover settings, auto-on circuitry and a detachable power cord.

> **FREQUENCY RESPONSE:**
(-6 dB, half space)
20 Hz-150 Hz

> **AMPLIFIER POWER:**
500 watt RMS
(1000 watt peak)

> **FEATURES:**
variable input
variable crossover
0-180° phase switch
line-level input
detachable power chord
auto-on circuitry

> **DRIVER COMPLEMENT:**
2 - 10" Kevlar™ woofers
1 - 500 watt amplifier with
switching power supply

> **DIMENSIONS:**
14.69" x 16.25" x 17.5"
(sealed enclosure)

> **WEIGHT:**
62 lbs.

> **FINISHES:**
Black

> **WARRANTY:**
Five-year (limited)
